

Empowering patients

Through the use of Health and Social Care Apps

NHS London Procurement Partnership (NHS LPP) are supporting the NHS Long Term Plan through the delivery of our **NHS LPP Health & Social Care Apps Dynamic Purchasing System (DPS)**, enabling patients to have a greater role in their care journey and wellbeing.

The **NHS LPP Health and Social Care Apps DPS** provides the public sector with a way to compliantly procure condition-specific apps to meet health and social care needs; supporting patients, clinicians and non-clinical staff.

The adoption of apps has already been proven to reduce GP visits, prevent costly trips to A&E, lower usage of prescription drugs and to help close the population health inequalities, delivering both direct and indirect savings and benefits.

Further categories will be added to the **DPS** soon and a list of these can be found in **LPP Sourcing**.

All suppliers of apps that apply to join the DPS will undergo an assessment by the Organisation for the Review of Care and Health Apps (ORCHA) and this will inform the selection decision made by NHS LPP.
